1.5" Inlet

Model VRFTHF**

Venturi Return Fitting Threaded
1.5" Inlet With Flange

Model VRFSA**

Venturi Return Fitting Self Aligning
Slip 1.5" Inlet

Model VRFSAF1**

Venturi Return Fitting Self Aligning
Slip 1" Inlet With Flange

Model VRFSA2**

Venturi Return Fitting Standard
Insert Slip 1.5" Inlet

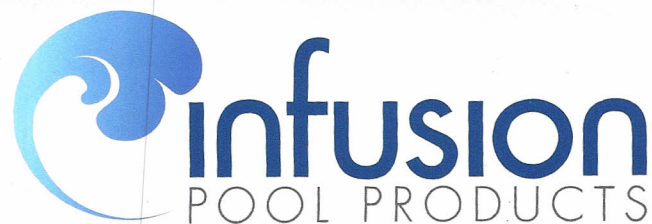

Model VRFSA2**

Venturi Return Fitting Self Aligning
Slip 2" Inlet

Model VRFSWA**

Venturi Return Fitting
Standard Wall Assembly
1" Inside 1.5" Outside Inlet

Revolutionary ENERGY EFFICIENT Deep Heating Venturi Return Line Fittings

**V-Fittings™ Enhance Any Vinyl,
Fiberglass or Concrete Pool!**

Available in Eight Designer Colors!

SAVE TIME, MONEY & ENERGY

EASIER TO SERVICE WATER QUALITY

The installation of Infusion's venturi return line fittings will save time, money and energy associated with owning, operating and servicing swimming pools while enhancing water quality through increased circulation and improved chemical disbursement. Venturi enhanced circulation disrupts sediment from side walls and floor of pool increasing the effectiveness of chemicals and swimming pool filters.

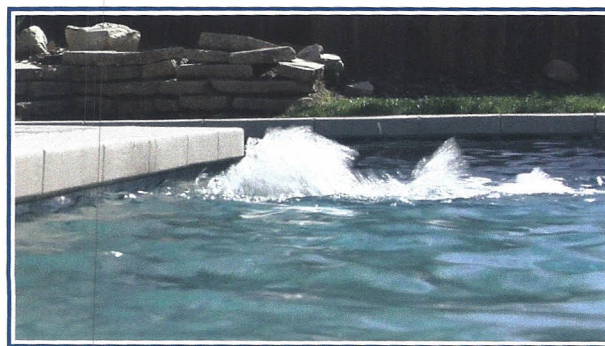

- Maximize efficiency of skimmers and automatic pool cleaners.
- Target dead spots, steps and benches eliminating algae buildup.
- Sweep debris towards main drain.
- Increased flow complements variable and multi speed pumps.

**RECOMMENDED ON
EVERY SWIMMING POOL
RETURN LINE INLET!**

FEATURES AND BENEFITS

V-Fittings' river flow and fountain features create a soothing, more enjoyable environment while maximizing pool skimmer performance. Easily adjustable, V-Fittings can be aimed towards the surface of the pool providing a cooling effect on hot summer days.

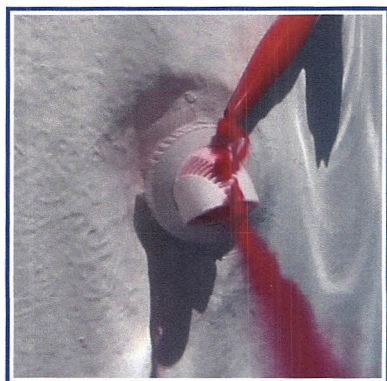

- Deep Heat and Reduce energy costs
- Extend the swim season
- Improve overall water quality
- Maximize solar system performance
- Pays for itself and keeps paying you back

ENERGY EFFICIENT V-FITTING™

Infusion Pool Products proudly introduces, our Revolutionary, Venturi Driven Swimming Pool Return Line Inlet Fittings called V-Fittings™.

V-Fitting's 60 degree venturi increases flow by drawing surface water through strategically placed louvers thrusting it to the floor. The result is a greater volume of water being dispersed improving turnover while deep heating and maximizing circulation.

The installation of V-Fittings provides energy savings through reduced circulating pump and pool heater operating times saving energy and money for the life of the pool!

HIGHLY RECOMMENDED

Go Green while saving money and improving water quality for the life of the pool!

MADE IN THE USA!

PRODUCTS V-FITTINGS™ COMPLEMENT

Advancements in product designs, along with new innovative solutions, are having a profound effect on the environment by reducing greenhouse gasses.

Some of the many pool products that V-Fittings highly complement by improving efficiency and overall performance are:

- Variable and multi speed circulation pumps
- Solar systems, blankets and rings
- Automatic pool cleaners
- Chemical applicators and chemicals
- Skimmers and swimming pool filters
- Ozone and salt systems
- Pool designs incorporating no main drains
